The MJS Group of Companies are private companies with extensive experience in providing specialist tree climbing services and contract plant and labour hire. MJS was formed a number of years ago in response to the need for tree removal services in the Adelaide Hills. They have evolved into a sizable operation employing over 30 personnel with skills covering all aspects of pruning and removal of trees, stumps and other vegetation with several staff being qualified Arborists. The skilled staff at MJS are a close-knit team who take pride in their ability to perform their work safely and efficiently under difficult and, sometimes arduous conditions.

Effective as of 1 July 2011 MJS South East Pty Ltd, based in Naracoorte, South East; will be part of the MJS Group of Companies and will be trading as Skywork.

MJS have acquired a reputation for the removal of trees & stumps with difficult access requirements, including sites in steep terrain, confined spaces, busy roads and in the case of site work for the Blanchetown Bridge in South Australia, even underwater!

MJS undertake a wide range of work for many Government Departments as well as the private sector, including tree pruning, tree removal, hazard reduction and all other aspects of tree work & roadside vegetation clearance for heavy vehicles. MJS are currently Panel Contract members with DPTI and are level 2 qualified for arboriculture services.

MJS Group Management Systems are certified by QMS Certification Services for earthworks, landscaping, tree management, plant hire and other arboriculture works.

MJS provide tree and stump removal services to local councils and Government and have undertaken tree trimming operations and emergency tree work at locations throughout the Adelaide Hills.

In many cases MJS are able to perform the work by employing tree climbers, thereby avoiding damage to sensitive vegetation with the use of heavy machinery. Sometimes, however, our operations do require the use of heavy machinery, such as Elevated Working Platforms (EWP), semi and tandem tipper trucks, excavators and loaders; however our workforce is trained and experienced in the operation of this type of plant and equipment.

The wide range of environmental work that has been undertaken includes the clearance of riverine environs for the Adelaide and Mount Lofty Ranges Natural Resources Management Board. This work was performed using an excavator with a specialised hedge trimmer attached. MJS also supplies plant and labour hire to Transfield Services in the Hills Region and other locations.

We are also able to offer the services of a qualified arborist to provide expert advice on tree health and safety. Written reports may be provided by prior arrangement.

You can see from the size and variety of work that we have undertaken in the past that we do not consider any job to be too small or too difficult; in fact we welcome unusual jobs as a challenge to our ingenuity and experience!
